NEW AND USED RACKING AND SHELVING AVAILABLE FROM STOCK

Whether you're planning a bespoke pallet storage and handling system for a new warehouse or perhaps you simply need a few bays of competitive priced racking or shelving, in either case, we're happy to help.

We offer a free design and quotation service based on many years experience in the storage and materials handling industry.

Just contact us for a free no obligation consultation with one of our experienced representatives.

Read on for case studies.

**NEW AND
USED
RACKING
AND
SHELVING
AVAILABLE
FROM
STOCK.**

PALLET RACKING

PALLET RACKING is available in many forms – High Bay, Narrow Aisle, Double deep, Drive-in etc. With years of experience behind us, we can supply the right system to meet your needs.

NO JOB IS TOO SMALL – A couple of bays in a small store or, **TOO BIG** – a full warehouse installation. Contact us and we will be pleased to discuss your requirements.

We have many satisfied customers **THROUGHOUT THE UK.**, many of whom have allowed us to photograph recent installations and reproduce them within this brochure.

We have stocks of **GOOD QUALITY NEW AND USED PALLET RACKING**, which is readily available should you have an urgent requirement.

Whether your requirement is for a modest amount of good quality used pallet racking,

OR a new 'double depth' installation for the storage of 6000 pallets,

▶ Photo. Hazel Products – Leeds.

OR small amounts of NEW pallet racking from our competitively priced stock.

▶ Photo. Silicone Engineering – Blackburn.

Make the very best use of available space, with a wire guided high rise narrow aisle system with pick up and deposit stations.

▶ Photo. Cumberland Pencil – Workington.

▶ Photo. Meyer Group Limited – Bromborough.

Perhaps you have a requirement for a large amount of new high rise pallet racking. This installation has 15,000 pallet positions.

Whatever the size of the project, we are happy to provide you with a first class service from consultation to design, supply and installation. Just call us for free advice and a quotation.

PALLET RACKING

Want to make the best use of your Cube?
What about Drive-in Racking?

SHELVING SYSTEMS

Whether it's a few bays of economical strong reliable British standard bolted shelving.

OR easily adjusted bolt free shelving for maximum flexibility.

Are shelving access aisles taking up space? Mobile shelving will give fantastic space utilisation with one aisle serving multiple banks of double racks.

Archive storage using longspan shelving for cost effective high density storage of archive boxes.

SHELVING SYSTEMS

Longspan shelving is economical, flexible and versatile. Available in many sizes from stock. Ideal for the storage of larger items not suitable for standard short span shelving.

ACCESSORIES

ANTI-COLLAPSE MESH

Should be fitted to single sided runs of Pallet Racking where pedestrians have access to the rear of the rack i.e. fire exits or walkways. Mesh panels are fitted to the rear of the rack to prevent unstable pallet loads from collapsing and causing injury. Panels stand off the rear of the rack to allow for pallet overhang.

LOAD NOTICES

All pallet racks should have Load Notices attached to them, detailing the maximum weight per pair of beams and the maximum bay load.

BAY/LOCATION MARKERS

Identify aisle and stock locations with these highly visible markers.

BARRIERS AND RACK PROTECTION

Save on costly repairs to damaged uprights by providing Barriers and Column Guards.

GUIDE RAILS

For Narrow Aisle applications. Securely fixed to the ground, they provide accurate aisles for your truck.

TIMBER AND MESH DECKS

Drop-in pre-constructed timber decks are essential when irregular sized pallets are stored on pallet racking. They are made to suit the particular length of beam and depth of frame. Decks can be made to carry most weights of pallet. Available in either open or close boarded, rough sawn or planed depending on the application. STEEL MESH DECKS are also available.

PALLET SUPPORT BARS

Used to support irregular shaped or weak pallets. They span the beams thus providing additional support.

If you need any help with a storage or materials handling problem we offer a free design service including site visits, a complete drawing-to-installation facility and we can be relied upon to be competitive. Please don't hesitate to call us.
